

## TODO Application:

### Problem Statement:

Make a small application that can be used as a simple todo list. You should be able to add tasks, view tasks, delete tasks.

It needs to be a client server application Architecture. ( WAMP Stack ) In addition to the code you need the following as well.

Functional requirements (required/desired)	3
Non-functional requirements	3
System Architecture Diagram	one for the complete system
Data Flow Diagram	one for the complete system ( level 2)
Use case	3 use cases
Sequence Diagram	3 sequence diagrams
Database Design	one for the system, 3 tables
Class diagram	one for the system, 3 classes
Test Case	3 operations to be tested

Add [4996WSU@gmail.com](mailto:4996WSU@gmail.com) to your repository.

In addition you need to provide a work break down for the assignment. It should have the following:

Name of the task  
Estimated No of hours  
Actual time spent  
Notes:  
Issues:
